SUBJECT INDEX

Vol. 70

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters

PAGE

A.c. loss in amorphous chalcogenides . . . . . 1035 B
Acceleration field, sedimentation in . . . . . 739 A
AFM of zirconium substrates . . . . . 1 B
Ag and Mg segregation in AlCuMgAg . . . . . 111 L
Ag, Au and Si irradiated targets, defects in . . . . . 93 L
Al, gel formation on . . . . . 163 B
Al:Ag, precipitation hardening in . . . . . 447 A
AlCo quasicrystals, surface domains in . . . . . 303 L
Al_3Co, structural model of . . . . . 221 L
$Al_{70}Co_{15}Ni_{15}$ quasicrystals . . . . . 281, 379 L
AlCuCo decagonal phases . . . . . 913, 1063 B
AlCuCoSi, decagonal . . . . . 41, 103 L
AlCuFe quasicrystals under high pressure . . . . . 855 B
AlCuMgAg, Ag and Mg segregation in . . . . . 111 L
AlCuMgAg, Si additions in . . . . . 851 A
AlCuRu quasicrystals . . . . . 261 L
Alkali halides, defect aggregation in . . . . . 313 A
AlLi, deformation modes in . . . . . 493 A
AlLi, Hall coefficient of . . . . . 67 B
Alloy phases, stability of . . . . . 1117 B
Alloys, plasticity and transformations in . . . . . 247 A
Alloys with minimal surface microstructures . . . . . 607 A
AlMnFeSi, Mn induced ordering in . . . . . 319 L
AlMnPd quasicrystals, structure of . . . . . 215 B
Al_2O_3, self-diffusion in . . . . . 761 A
Al_2O_3:V interfaces, structure of . . . . . 75 A
Al_3Pd, structure of . . . . . 155 L
AlPd quasicrystal, structure of . . . . . 163 L
AlPdMn quasicrystals . . . . . 55, 311 L
Al_3Ti, Cr modified, plastic deformation of . . . . . 159, 171 A
Aluminium ceramic composites . . . . . 819 A
AlY, phase constitution in . . . . . 1129 B
AlZnMg, Guinier–Preston zones in . . . . . 135 L
Amorphization, reversible, in C_{70} . . . . . 347 B
Amorphous multilayers of Se:CdSe . . . . . 205 B
Amorphous semiconductors . . . . . 535, 557 B
Amorphous semiconductors, phonons and defects in . . . . . 1003 B
Amorphous Si:H, hydrogen bonding in . . . . . 1187 B
Amorphous Si:H, geminate recombination in . . . . . 1219 B
Antiphase boundary energy in Fe_3Al . . . . . 29 L
Antiphase boundary tubes in Ni_3Al . . . . . 121 L
Approximant phases, Ti based . . . . . 11 B
Approximants of AlPdMn quasicrystals . . . . . 55 L
Ar ion bombardment of $FePd_2Au$ . . . . . 439 A
Ar irradiation of Au surfaces . . . . . 151 B
Astroloy, microchemistry in . . . . . 189 L
Atomic displacements in f.c.c. metals . . . . . 255 L

Atomic manipulation on Si . . . . . 711 B
Au, Ag and Si irradiated targets, defects in . . . . . 93 L
Au surfaces, STM of . . . . . 151 B
AuCu, new phase in . . . . . 203 L

Back-scattered electron detectors . . . . . 985 A
Bain transformation, energetics of . . . . . 621 A
Band structure of semiconductors . . . . . 409 B
Barium titanate, twins in . . . . . 1021 B
Binary systems, coexisting phases in . . . . . 295 B
Biomembranes, growth of . . . . . 335 L
BiSrCaCuO, electrochemical synthesis of . . . . . 327 L
BiSrCaCuO, grain boundaries in . . . . . 195 L
BiSrCaCuO, structure of . . . . . 549 A
Brewster angle and applications . . . . . 493 B
Brittle materials, secondary cracks in . . . . . 277 L

C15 Laves compounds, elastic properties of . . . . . 867, 881 B
C_{60}, doping of after ion implantation . . . . . 893 B
C_{60}, phase transition in . . . . . 795 B
C_{70}, photoluminescence and Raman studies of . . . . . 347 B
C_{60}, Raman spectrum of . . . . . 651 B
C_{60}, superconductivity in . . . . . 627 B
Carbon films, diamond-like . . . . . 951 B
Carbon nanotubes, amorphous phase in . . . . . 357 L
Cardona, Manuel . . . . . 313, 521, 647 B
Carrier scattering in Ge . . . . . 661 B
Cathodoluminescence of brown diamonds . . . . . 1177 B
C_{70}/C_{60} ratio in fullerene . . . . . 721 B
CdTe on GaAs, HREM study of . . . . . 277 A
Ceramic aluminium composites . . . . . 819 A
Ceramic powders, sol–gel coating of . . . . . 389 L
Ceramic Ti(C,N)TiB_2Ni, interfaces in . . . . . 905 A
Chalcogenides, amorphous, charged defects in . . . . . 287 L
Charge transport in polymers . . . . . 1111 B
Co-based multilayers, properties of . . . . . 767 B
Coexisting phases in binary systems . . . . . 295 B
Copper, grain boundary sliding in . . . . . 805 A
Correlation processes in diffusion . . . . . 481 A
Corrosion in carbon coated Ni . . . . . 385 L
Coulomb gap, electrode screening of . . . . . 1231 B
Cr modified Al_3Ti, plastic deformation of . . . . . 159, 171 A
Crack nucleation in zirconia . . . . . 201 A
Crack velocity, Mott derivation of . . . . . 231 L
Creep and growth, irradiation . . . . . 713 A
Creep in substitutional solid solutions . . . . . 409 A
Crystal field interaction, model of . . . . . 175 B
Crystals, plastic deformation of . . . . . 99 A
Cu, configuration of loop patch in . . . . . 591 A
Cu, internal stresses in . . . . . 329 A
Cu, point defects in . . . . . 23 L
Cu in Fe, structure of . . . . . 1 A
Cu_3Au, diffusion in . . . . . 269 L
Cubic crystals, electrostriction in . . . . . 359 B
CuCl, nonlinear optics of . . . . . 321 B
CuNi, vacancy formation in . . . . . 519 A
Current–current interactions in a Fermi gas . . . . . 293 L
CuZn, mechanical alloying of . . . . . 77 B

Decagonal AlCuCoSi, structure of . . . . . 103 L
Decagonal AlPdMn quasicrystals, structure of . . . . . 311 L
Decagonal phase in $Al_{70}Co_{15}Ni_{15}$ . . . . . 379 L
Decagonal quasicrystalline phases . . . . . 1063 B
Defect aggregation in alkali halides . . . . . 313 A
Defect creation in Si:H . . . . . 133 B
Defect jump probabilities . . . . . 775 A
Defects, charged, in amorphous chalcogenides . . . . . 287 L
Defects and free electrons in Si . . . . . 247 L
Defects in diamond, ESR of . . . . . 101 B
Deformation, role of texture in . . . . . 219 A
Deformation, superplastic, mechanism of . . . . . 109 A
Deformation in metal composites . . . . . 1 L
Deformation in Ni_3Al . . . . . 951 A
Deformation of TiAl, effect of O_2 on . . . . . 211 L
Deformation modes in AlLi . . . . . 493 A
Deformation twinning in Ni_3Al . . . . . 145 A
Detectors, back-scattered electron . . . . . 985 A
Diagonalization of Hamiltonians . . . . . 305 B
Diamond, ESR of defects in . . . . . 101 B
Diamond-like carbon films . . . . . 951 B
Diamonds, brown, cathodoluminescence of . . . . . 1177 B
Diffusion, correlation processes in . . . . . 481 A
Diffusion, tracer, in pure crystals . . . . . 677 A
Diffusion in Cu_3Au . . . . . 269 L
Diffusion in 2D arrays of particles . . . . . 1107 A
Disclinations at grain boundaries . . . . . 561 A
Disintegration of Prince Rupert's drops . . . . . 1195 B
Dislocation arrays at GaSb–GaAs interface . . . . . 363 L
Dislocation emission from a crack . . . . . 893 A
Dislocation loop in $Al_{70}Co_{15}Ni_{15}$ . . . . . 281 L
Dislocation structure in Ni_3Ge . . . . . 1013 A
Dislocation-wall formation in slip bands . . . . . 75 L
Dislocations, mobility of in semiconductors . . . . . 943 A
Dislocations in $Al_{62}Cu_{20}Co_{15}Si_3$ quasicrystals . . . . . 41 L
Dislocations in elastic solids . . . . . 725 A
Dislocations in heterostructures . . . . . 531 A
Dislocations in quasicrystals . . . . . 577 A
Dislocations in TiAl . . . . . 43 A
Disordered surfaces, Raman scattering at . . . . . 747 B
Disordering behaviour of Fe_2Al . . . . . 1067 A
Dispersion work hardening . . . . . 129 L
Dispersive hopping, transport, model of . . . . . 59 B
Domain evolution in YBaCuO . . . . . 65 L
Domain structure in ZrO_2:CeO_2 . . . . . 505 A
Ductility criterion for materials . . . . . 893 A
Dynamical recovery of InSb . . . . . 87 L

Elastic properties of C15 Laves compounds . . . . . 867, 881 B
Elastic solids, dislocations in . . . . . 725 A
Elastic solids, interfaces in . . . . . 641 A
Electrode screening of the Coulomb gap . . . . . 1231 B
Electrodeposits of Zn, structure of . . . . . 391 A
Electron gas, two-dimensional . . . . . 429 B, 141 L
Electron–phonon coupling in elemental metals . . . . . 463 A
Electrostriction in cubic crystals . . . . . 359 B
Entropy-stabilized structures of AlCuRu . . . . . 261 L

Epitaxial crystals, buckling of . . . . . 233 A
Epitaxial growth of InP . . . . . 1045 A
Epitaxial Si:SiO_2 . . . . . 341 A
Exciton states in ZnTe . . . . . 335 B

F.c.c. metals, atomic displacements in . . . . . 657 A, 255 L
F.c.c. metals, plastic multislip in . . . . . 793 A
F.c.c. metals, stacking faults in . . . . . 869 A
Fe, Cu precipitated in . . . . . 1 A
Fe_3Al, antiphase boundary energy in . . . . . 29 L
Fe_2Al, disordering behaviour of . . . . . 1067 A
FeCr, oxide films on, STM of . . . . . 241 B
$FePd_2Au$, Ar ion bombardment of . . . . . 439 A
Fermion current–current interactions . . . . . 293 L
Ferroelectric phase in La-modified $PbZrTiO_3$ . . . . . 33 B
Fibre pull-out with a rough interface . . . . . 359 A
Fluorinated Si:H, preparation of . . . . . 263 B
Foam, monodisperse, structure of . . . . . 345 L
Fractional quantum Hall systems . . . . . 429, 617 B
Free volumes in quasicrystalline AlCuCo . . . . . 913 B
Friedel oscillations in a 2D electron gas . . . . . 141 L
Fullerene, C_{70}/C_{60} ratio in . . . . . 721 B

GaAs, CdTe on, HREM study of . . . . . 277 A
GaAs, phonons in . . . . . 687 B
GaAs quantum wells on Si . . . . . 381 B
GaAs/InGaAs superlattices . . . . . 481 B
GaInP, photoluminescence of . . . . . 453 B
GaSb and InSb on GaAs, heterointerfaces in . . . . . 467 B
Gd, piezoreflectance of . . . . . 499 B
Ge, carrier scattering in . . . . . 661 B
Ge and Si, interstitial defects in . . . . . 287 A
Ge and Si amorphous alloys, modelling of . . . . . 547 B
Ge:H and Si:H amorphous, mobility in . . . . . 109 B
Gel formation on Al . . . . . 163 B
Geminate recombination in a-Si:H 1219B
GeS alloyed with Pb, transport in . . . . . 1035 B
GeSe, Pb modified . . . . . 89 B
GeSi/Si superlattices, stress and strain in . . . . . 1091 A
Glasses, lithium thioborate, a.c. conductivity of . . . . . 809 B
Glasses of YAlSiON, structure of . . . . . 191 B
Grain boundaries in BiSrCaCuO . . . . . 195 L
Grain boundaries in YBaCuO . . . . . 969 A
Grain boundary junctions, disclinations at . . . . . 561 A
Grain boundary sliding in copper . . . . . 805 A
Grain growth, models for . . . . . 335 L
Grain growth in YBaCuO ceramics . . . . . 141 B
Growth spirals in YBaCuO . . . . . 47 L
Guinier–Preston zones in AlZnMg . . . . . 135 L

Hall coefficient of AlLi . . . . . 67 B
Hamiltonians, diagonalization of . . . . . 305 B
Harper–Dorn creep in Pb, rutile and ice . . . . . 81 L
H.c.p. alloys, ground state structures in . . . . . 1117 B
Heterogeneous structure of ZnCo . . . . . 373 A
Heterojunctions in semiconductors . . . . . 567 B
Heterostructures, dislocations in . . . . . 531 A
Heterostructures, semiconductor . . . . . 369 B

High T superconductors, resistivity in . . . . . 637 B
Homogeneous nucleation, time lag in . . . . . 49 B
Hopping transport, dispersive, model of . . . . . 59 B
Hydrogen absorption in $LaNi_5$ . . . . . 837 A
Hydrogen bonding in a-Si:H . . . . . 1187 B

Ice, rutile and Pb, Harper–Dorn creep in . . . . . 81 L
Icosahedral and crystal approximant TiZrNi . . . . . 927 B
InGaAs/GaAs, misfit dislocations in . . . . . 999 A
InGaAs/GaAs superlattices . . . . . 481 B
Injection dose effect in semiconductors . . . . . 1095 B
InP, epitaxial growth of . . . . . 1045 A
InSb, dynamical recovery of . . . . . 87 L
InSb and GaSb on GaAs, heterointerfaces in . . . . . 467 B
Interfaces, preferred orientation in . . . . . 1055 A
Interfaces in elastic solids . . . . . 641 A
Internal stresses in Cu . . . . . 329 A
Ionic mobility in YBaCuO . . . . . 149 L
Irradiation creep and growth . . . . . 713 A
Isotope and zero point shifts . . . . . 527 B
Isotope effect in C_{60} . . . . . 651 B

Jump probabilities of defects . . . . . 775 A

K_3C_{60}, Knight shift in . . . . . 787 B
Kr, retention of in Si . . . . . 241 L

LaN_5, hydrogen absorption in . . . . . 837 A
Lattice defects in Mn_3O_4 . . . . . 1077 B
Lead zirconate titanate, La-modified . . . . . 33 B
Lithium thioborate glasses, a.c. conductivity of . . . . . 809 B
Locks, Paidar–Pope–Vitek, in L12 compounds . . . . . 179 L
Loop patch, configuration of in Cu . . . . . 591 A

Magneto-optical properties of quantum wells . . . . . 397 B
Martensite, 2H, stacking defects in . . . . . 63 A
Martensitic transformations, TEM of . . . . . 35 A
Matter transport in f.c.c. alloys . . . . . 657 A
Mechanical alloying of CuZn . . . . . 77 B
Metal composites, deformation in . . . . . 1 L
Metal-oxide semiconductors, structure of . . . . . 235 L
Metallic glasses in Nb based alloys . . . . . 371 L
$MgAl_2O_4$ spinel, amorphization in . . . . . 235 L
Microchemistry in Astroloy . . . . . 189 L
Minimal area space filling partitions . . . . . 351 L
Minimal surface microstructures . . . . . 607 A
Misfit dislocations in InGaAs/GaAs . . . . . 999 A
Mn-induced ordering in AlMnFeSi . . . . . 319 L
Mn_3O_4, lattice defects in . . . . . 1077 B
MO_4 and MO_6 clusters, EXAFS of . . . . . 1161 B
Monodisperse foam, structure of . . . . . 345 L
Mott derivation of crack velocity . . . . . 231 L
Multilayers, Co-based, properties of . . . . . 767 B
Multiple scattering in EXAFS of MO_4 clusters . . . . . 1161 B

Nanostructures in semiconductors, optics of . . . . . 583 B
Nanotubes, carbon, amorphous phase in . . . . . 357 L
Nb based alloys, metallic glasses in . . . . . 371 L

Ni, carbon coated, corrosion in . . . . . 385 L
Ni_3Al, antiphase boundary tubes in . . . . . 121 L
Ni_3Al, deformation in . . . . . 145, 951 A
Ni_3Ge, dislocation structure in . . . . . 1013 A
Nonlinear optics of CuCl . . . . . 321 B
Nonlinear viscoelastic polycrystals . . . . . 689 A
Nuclear spin relaxation in oxide glasses . . . . . 1045 B
Nucleation, effect of on recrystallization . . . . . 817 B
Nucleation, homogeneous, time lag in . . . . . 49 B

Optical anisotropy of Sb on V . . . . . 507 B
Ordering in metal–non-metal interfaces . . . . . 1055 A
Orthorhombic Al_3Co, structural model of . . . . . 221 L
Oxide films on FeCr, STM of . . . . . 241 B
Oxide glasses, nuclear spin relaxation in . . . . . 1045 B
Oxygen, effect of on phase transition in C_{60} . . . . . 795 B
Oxygen, stability of in YBaCuO . . . . . 643 B

Paidar–Pope–Vitek locks in L12 compounds . . . . . 179 L
Paraffin, Ising model of . . . . . 15 L
Partitions, space-filling . . . . . 351 L
Pb, rutile and ice, Harper–Dorn creep in . . . . . 81 L
Pb modified GeSe . . . . . 89 B
Phase constitution in AlY . . . . . 1129 B
Phase separating a-semiconductors . . . . . 557 B
Phase transition in $RbCaF_3$:Gd . . . . . 851 B
Phonons and defects in a-semiconductors . . . . . 1003 B
Phonons in disordered silicon carbides . . . . . 971 B
Phonons in GaAs . . . . . 687 B
Phonons in semi-infinite superlattices . . . . . 761 B
Photoconductivity in Si:H . . . . . 253, 277 B
Photoluminescence in GaInP . . . . . 453 B
Photoluminescence spectra, sum rule . . . . . 963 B
Piezoreflectance of Gd . . . . . 499 B
Plastic behaviour of zinc . . . . . 1027 A
Plastic deformation of crystals, model of . . . . . 99 A
Plastic multislip in f.c.c. metals . . . . . 793 A
Plasticity and transformation in alloys . . . . . 247 A
Plasticity in TiO solid solutions . . . . . 423 A
Point defects in Cu . . . . . 23 L
Point defects in h.c.p. Zr . . . . . 25 A
Polymers, charge transport in . . . . . 1111 B
Precipitation hardening in Al:Ag . . . . . 447 A
Prince Rupert's drops, disintegration of . . . . . 1195 B

Quantum Hall systems, fractional . . . . . 617 B
Quantum wells, magneto-optical properties of . . . . . 397 B
Quantum wells in GaAs on Si . . . . . 381 B
Quantum wires, spin polarization in . . . . . 601 B
Quartz, vibrational modes in . . . . . 699 B
Quasicrystalline AlPd, structure of . . . . . 163 L
Quasicrystalline ZnMgRE . . . . . 169 L
Quasicrystals, AlMnPd, structure of . . . . . 215 B
Quasicrystals, comparison with Al_3Pd . . . . . 155 L
Quasicrystals, dislocations in . . . . . 577 A
Quasicrystals of AlCuFe under high pressure . . . . . 855 B

Rb_3C_{60}, Knight shift in . . . 787 B
$RbCaF_3$:Gd, phase transition in . . . 851 B
Recrystallization, effect of nucleation on . . . 817 B
Resonant tunnelling in a-Si:H . . . 1139 B
Rough interfaces, fibre pull-out with . . . 359 A
Roughening transition in paraffin . . . 15 L
Rutile, Pb and ice, Harper–Dorn creep in . . . 81 L

Sb on V, optical anisotropy of . . . 507 B
Screened-charge crystal field model . . . 175 B
Screening in amorphous semiconductors . . . 417 B
Screw superdislocation in L12 structure . . . 925 A
Se:CdSe amorphous multilayers . . . 205 B
Secondary cracks in brittle materials . . . 277 L
Sedimentation in an acceleration field . . . 739 A
Self diffusion in Al_2O_3 . . . 761 A
Semiconductor heterostructures . . . 369, 567 B
Semiconductor nanostructures, optics of . . . 583 B
Semiconductor superlattices, phonons in . . . 671 B
Semiconductors, amorphous . . . 535, 557 B
Semiconductors, band structure of . . . 409 B
Semiconductors, mobility of dislocations in . . . 943 A
Semi-infinite superlattices, phonons in . . . 761 B
Si, Ag and Au irradiated targets, defects in . . . 93 L
Si, atomic manipulation on . . . 711 B
Si, effect of impurities on tensile strength . . . 53 A
Si, free electrons and defects in . . . 247 L
Si, retention of krypton in . . . 241 L
Si additions in AlCuMgAg . . . 851 A
Si and Ge, interstitial defects in . . . 287 A
Si and Ge amorphous alloys, modelling of . . . 547 B
Si:Ga, surface structure of . . . 731 B
Si:H, defect creation in . . . 133 B
Si:H, fluorinated, preparation of . . . 263 B
Si:H, neutron-irradiated, vacancies in . . . 905 B
Si:H, photoconductivity of . . . 277 B
Si:H, resonant tunnelling in . . . 1139 B
Si:H and Ge:H amorphous, mobility in . . . 109 B
Si:H/Si:N superlattices, photoconductivity in . . . 253 B
Silicon carbides, disordered, phonons in . . . 971 B
Sintering of fine powders . . . 1107 A
Si:SiO_2, epitaxial . . . 341 C
Slip bands, dislocation-wall formation in . . . 75 L
Sol–gel coating of ceramic powders . . . 389 L
Solid solubility of Ti in Al alloys . . . 919 B
Solid solutions of spinels, transport in . . . 121 B
Space charge limited current, trap free . . . 331 L
Spin polarization in quantum wires . . . 601 B
Spinel solid solutions, transport in . . . 121 B
Stacking defects in 2H martensite . . . 63 A
Stacking faults in f.c.c. metals . . . 869 A
Strained epitaxial crystals, buckling of . . . 233 A
Stress and strain in GeSi/Si superlattices . . . 1091 A
Substitutional solid solutions, creep in . . . 409 A
Sum rule for photoluminescence spectra . . . 963 B
Superconducting BiSrCaCuO, synthesis of . . . 327 L
Superconductivity in C_{60} . . . 627 B
Superconductors, high T_c resistivity in . . . 637 B

Superdislocation screw in L12 structure . . . . . 925 A
Superlattice semiconductors, phonons in . . . . . 671 B
Superplastic deformation, mechanism of . . . . . 109 A
Superplastic ZnAl, structure of . . . . . 7 L
Surface domains in AlCo quasicrystals . . . . . 303 L
Surface parameters in semiconductors . . . . . 1095 B
Surface structure of Si:Ga . . . . . 731 B
Surfaces, disordered, Raman scattering at . . . . . 747 B

Tensile strength of Si . . . . . 53 A
Texture, role of in deformation . . . . . 219 A
Ti based decagonal approximant phases . . . . . 11 B
Ti in Al alloys, solid solubility of . . . . . 919 B
TiAl, dislocations in . . . . . 43 A
TiAl, effect of O_2 on deformation of . . . . . 211 L
TiAl, translation twins in . . . . . 917 A
TiAl and Ti, Ti–Ti bonding in . . . . . 987 B
Ti(C,N)TiB_2Ni ceramics, interfaces in . . . . . 905 A
Ti–Ti bonding in TiAl and Ti . . . . . 987 B
TiO solid solutions, plasticity in . . . . . 423 A
TiZrNi, crystal approximant phases in . . . . . 927 B
Tracer diffusion in pure crystals . . . . . 677 A
Transformation, Bain, energetics of . . . . . 621 A
Transformations, martensitic, TEM of . . . . . 35 A
Translation twins in TiAl . . . . . 917 A
Trap-free space-charge-limited current . . . . . 331 L
Twin interfaces in Zn . . . . . 261 A
Twins in barium titanate . . . . . 1021 B

Vacancies in neutron-irradiated Si:H . . . . . 905 B
Vacancy defects in elemental metals . . . . . 463 A
Vacancy formation in CuNi . . . . . 519 A
V:Al_2O_3 interfaces, structure of . . . . . 75 A
Vibrational modes in quartz . . . . . 699 B
Visco-elastic polycrystals, nonlinear . . . . . 689 A
Vortex dimensionality of YBaCuO . . . . . 773 B

Wedge, weight function for . . . . . 297 L
Weight function of a wedge . . . . . 297 L
Work hardening, dispersion . . . . . 129 L

YAlSiON glasses, structure of . . . . . 191 B
YBaCuO, domain evolution in . . . . . 65 L
YBaCuO, grain boundaries in . . . . . 969 A
YBaCuO, growth spirals in . . . . . 47 L
YBaCuO, ionic mobility in . . . . . 149 L
YBaCuO, stability of O in . . . . . 643 B
YBaCuO, vortex dimensionality of . . . . . 773 B
YBaCuO ceramics, grain growth in . . . . . 141 B
Y_2O_3:ZrO_2 and ZrO_2, structure of . . . . . 185 A

Zero point and isotope shifts . . . . . 527 B
Zinc, plastic behaviour of . . . . . 1027 A
Zirconia, crack nucleation in . . . . . 201 A
Zirconium substrates, AFM of . . . . . 1 B
Zn, twin interfaces in . . . . . 261 A
Zn electrodeposits, structure of . . . . . 391 A
ZnAl, superplastic, structure of . . . . . 7 L

ZnCo, heterogeneous structure of . . . . . 373 A
ZnMgRE quasicrystals . . . . . 169 L
ZnSe, resonant Raman scattering in . . . . . 443 B
ZnTe, exciton states in . . . . . 335 B
Zr, h.c.p. point defects in . . . . . 25 A
ZrO_2 and Y_2O_3:ZrO_2, structure of . . . . . 185 A
ZrO_2:CeO_2, domain structure in . . . . . 505 A

INDEX OF AUTHORS (WITH TITLES)

Vol. 70

A indicates papers published in Part A
B indicates papers published in Part B
L indicates papers published in the Letters
